Paper II A : Human Development

(Theory)

M.M - 100

Focus : This an attempt to guide students in understanding the field of human development. A conscious deviation is taken from the stage wise approach to the life span, so as to make the course more meaningful and to allow for flexibility in understanding human development as a continuous process.

Objectives :

1. To introduce the student to the field of human development, concepts, scope, dimensions and interrelations.
2. To sensitive the student to interventions in the field of human development.

Unit I : Introduction to Human Development

1. Concept of human development.
2. Historical perspective.
3. Different methods of study.
4. Importance and scope in Indian perspective.
5. Principles of child development.
6. Nature vs nature controversy (Heredity and Environment).

Unit II : Prenatal Development

1. To birth.

2. Birth process.
3. Complications related to birth process and genetic defects.
4. Hazards during prenatal development.

Unit III : Infancy (0-2 years)

1. Newborn : Features and Capabilities.
2. Physical and Motor Development during Infancy.
3. Social and emotional development.
4. Development takes of infancy.

Unit IV : Early Childhood (2-6)

1. Motor, Language, Cognitive and Social development of pre-school child.
2. Importance of play.
3. Developmental tasks of early childhood.

Unit V : Middle Childhood (6-12 year)

1. Cognitive, Moral and social development.
2. Importance of school and peers.

Unit VI : Adolescence (13-18 years)

1. Physiological changes : Puberty, Growth spurt.
2. Primary and secondary sex characteristics, Early and late maturing adolescents.
3. Identity : Definition, Position and negative outcomes.
4. Emotional maturity.
5. Problems of adolescence : drugs and alcohol abuse, delinquency, homosexual relations, psychological problems etc.

Unit VII : Old Age (60 years and above)

- Definition, Physiological changes and psychological influences of ageing.

Paper IIA:Home Management

(Theory)

M.M - 100

Focus : This course deals with the management of resources in the family with particular reference to mobilizing all the resources for achieving the family goals. It also deals with factors motivating management and management applied to specific resources.

Objective :

1. To Create an awareness among the students about management in the family as well as the other systems.
2. To recognize the importance of wise use of resources in order to achieve goals.

Unit I : Introduction to Management

- * Concept of Home Management - Meaning, Scope, Philosophy and Role of Home Management in family living.

Unit II : Obstacles to the Improvement of Management

1. Lack of awareness of management.
2. Lack of awareness of resources.
3. Failure to evaluate results of management.
4. Seeking ready made answers to problems.
5. Lack of Information.

Unit III : Factor Motivating Management

1. Goals, Definition, Types and utility.
2. Values - Importance, Sources, Changing values.
3. Standards - Definition, Classification, Quantitative, Qualitative, Conventional and

non conventional.

4. Decision - Role of decision making in management.

Unit IV : Family Characteristics Influencing Management

1. Life style.
2. Types of family.
3. Family size, Stage of family life cycle.

Unit V : Management Process

1. Meaning and elements of process - Planning, Controlling the plan and evaluating, Decision making.
2. Planning - Importance, Techniques, Types of Plan

* Controlling the plan in action.

* Phase energizing checking.

I. Factor in success of the control step.

II. Suitability.

III. Promptness.

IV. New decisions.

V. Flexibility.

* Supervision of delegated Plan

I. Types of supervision - direction and guidance.

II. Analysis of supervision.

* Evaluation

I. Importance, Relationship to goals

II. Types - Informal and formal, Overall and detailed

III. Techniques of sey evaluation

IV. Evaluation of the whole process of management

Unit VI : Resources in the Family

1. Types of resources.

Paper IIB Household Equipment

(Theory)

M.M : 100

Focus : This course intends to impart knowledge and understanding of construction of household equipment, the material used, selection criteria, their

operations, maintenance and care. To make them aware of new trends and handle minor problems of repair.

Objectives :

To enable students to

1. Recognize base materials, finishes and insulating materials used in the construction of household equipment.
2. Understand the principles underlying the operation, use, care and storage of household equipment.
3. Understand the criteria for the selection for appropriate equipment for home and suitable material for functionality.
4. Be aware of new trends in equipment in market.
5. Analyze various equipment with respect to design, cost and maintenance.
6. Understand handle minor problems of repairs and maintenance.

Unit I: Material Used for Household Equipment

1. Base materials - aluminum, iron, steel, stainless steel, copper, brass, glass, plastic.
2. Finishes - mechanical and applied.
3. Insulating materials - mica, fiberglass, mineral wool, rock wool, puff, plastic, foams, rubber etc.

Unit II: Methods of Forming and Assembling Equipment

- Structural designing of the equipment and different joints used in assembling parts of the equipment.

Unit III Selection, Use, Care and Store of Household Equipment

- Resource conservation.

Unit IV Classification of Household Equipment in Terms of

1. Portable and non-portable.

2. Electrical - Motor driven and heating.
3. Food related (cooking devices, cooker).
4. Laundry.
5. Cleaning.
6. Personal care.
7. Recreation.
8. Non-electrical.
9. Small kitchen tools - knives, peelers, graters, strainers, ladles, spoons.

Unit V: Equipment Design and their effect on work and body postures

Unit VI: Certification and Guarantee - Their meaning, importance and implication

M.A Part II (Home Science)

Paper IIIA : Education and Communication for development

(Theory)

M.M - 100

Objectives :

To enables students to

1. Understand the process of communication in development work
2. Develop skills in the use of methods and media
3. Be sensitive to the interests and needs of the people and the power of the media and methods in catering to these needs and interests.

Unit I: Concept and Types of Education

1. What is education ?
2. The need of education.

3. Types of education.
4. Formal education.
5. Non formal education.
6. Extension education.

Unit II: Non formal education

1. Form whom is it intended ?
2. What is its content ?
3. What are the learning processes ?
4. Where does it lead to ?

Unit III: Extension Education

1. Concept of extension education.
2. Philosophy of extension education.
3. Principles of extension education
4. History of extension activities.

Unit IV: Role of Teacher, Subject matter specialist and Extension worker and qualities of an Extension worker

Unit V: Role of Extension Education in development

1. Development aspects of extension .
2. Agriculture extension .
3. Extension as a Program and process.

Unit VI: Concept and functions of communication

1. Definition and meaning.
2. Communication - A two way process.
3. Importance of communication in extension were
4. Functions of communication.

Unit VII: Problems in Communication

Unit VIII: Communication approaches and Audio-visual Aids

1. Methods of extension teaching.
2. Personal, Group and Mass approach.
3. How to select teaching tools.

Unit IX: Visual aids, Audio aids and Audio-visual aids

Unit X: Other teaching aids like

1. Puppets, Drama.
2. Use tasks, Meeting, Conferences, Tours, Campaigns camps etc.

**RESEARCH METHODOLOGY-
EXPERIMENTAL METHODS****Objective :**

This course aims at familiarizing students with various designs of experiments along with statistical procedures.

CONTENTS**1. Experimentation in Psychology**

Purpose; Nature of variables; Techniques of experimental manipulation; Impact and control in experiment. Sources of bias. Ethical issues in psychological research.

2. Between-Group Designs

Single factor designing; Randomized Block Design; Factorial Design; Nested Designs. Multiple comparison among Mean, DMRT, Newman Keuls, Tuckey, Protected Y; Non-parametric tests of ANOVA; Sign test; U Test.

3. Within-Group Designs

Single and two factors repeated measures designs; Trend analysis (Linear, Quadratic & Cubic).

4. Mixed Designs

Two or three factors mixed designs with repeated measures on one factor.

5. Latin-Square Design

Greco-Latin Square design; Crossover design; ANCOVA.

SOCIAL PSYCHOLOGY**Objective :**

This course aims at enabling students to

1. Appreciate how individual behaviour is influenced by social and cultural context.
2. Understand how social behaviour can be analysed in terms of social-psychological theories.
3. Realise how social-psychological knowledge can be used in solving social problems.

CONTENTS**1. Historical Background**

Growth of social psychology as a modern discipline; Traditions of social psychology; psychological, sociological, societal and applied; Culture and social psychology; Relationship with other social sciences.

2. Theoretical Perspectives

Cognitive dissonance, social comparison, reactance, attribution, social identity; Field; Psychodynamic; Symbolic interactionism; Social constructionism, Social representation; Sociobiology.

3. Understanding Relationship and Group Processes

Human relationship; Social motivation; Pro-social behaviours; Aggression; Social emotions; Group dynamics;

Meaning of group, group formation, decision making and problem solving; Insights from small group research; Group level behaviours.

4. Social Cognition and Influence Processes

Person perception and social cognition; social power and political processes; Mass media, communication and attitude change in Indian context; Persuasion, propaganda and brain washing; Leadership styles and effectiveness.

5. Applied Social Psychology

Inter-group relations; Poverty; Gender issues; Social Institutions; Problems of social change; Population issues; Social movements.

**RESEARCH METHODOLOGY
NON-EXPERIMENTAL DESIGN AND
CORRECTIONAL METHODS**

Objectives :

This course deals with research methods that are employed in field settings. Correctional analysis techniques with numerical examples will be discussed. Also, familiarity with multivariate techniques is expected.

CONTENTS**1. Non and quasi-Experimental Designs**

One group designs; Non-equivalent control group designs; Interrupted time-series designs; Multiple time-series design.

2. Correlational Designs

Cross-sectional and longitudinal designs; Panel design.

3. Newer Social Methods

Life history; Meta-analysis; Simulation and games; Evaluation research.

4. Advanced Correlation Methods

Measures of association; Multiple regression (Linear; Stepwise; Logistic and probit); Factor Analysis Techniques and implication.

5. Discriminant Function Analysis.

Techniques - Orthogonal, Canonical; Interpretation of results and application.

MARKS 100

BEHAVIOUR MODIFICATION

Objectives :

1. To impart knowledge and develop skills needed for applying behaviour modification techniques
2. To impart knowledge and develop skills towards self-development.

CONTENTS

1. Introduction

Merits and limitations of behavioural approach.

2. Behavioural Analysis

Enhancing client's involvement - Behavioural counselling.

3. Relaxation Techniques

Jacobson's Progressive Muscular Relaxation- Autogenic Training- yoga, meditation etc.

4. Systematic Desensitisation

Basic principles - construction of hierarchy - scene presentation - theory of desensitisation.

5. Assertiveness Training

Components of assertive behaviour; method of assertiveness training- implementing assertive procedures.

6. Operant Conditioning Techniques

Basic paradigm - schedules of reinforcement - token economy - shaping - chaining - Premack's principle.

7. Cognitive Behaviour Modification

Meichenbaum's self-instruction training - Beck's model- Rational emotive therapy of Ellis.

8. Clinical Applications of Behaviour Therapy

In anxiety disorders, Psychoactive substance use disorders- Sexual disorders- Psychotic disorders- personality disorders- Childhood disorders - Biofeedback principles and clinical applications.

9. Educational Guidance

Programmed learning-guidance in elementary school and secondary school-guidance towards life goals.

MARKS - 100

CROSS-CULTURAL PSYCHOLOGY

Objectives:

1. This course intends to provide an insight into the role of cultural context in shaping diverse aspects of social behaviour and its relevance to solving social problems.

CONTENTS

1. Culture and behaviour

Nature of culture, Cultural relativity and universality of human behaviour, Mechanisms of cultural transmission.

2. Methodology of Cross-cultural Psychology

Comparability and equivalence, Universals, Emics and etics; Sampling and measurement issues, Back translation, decentering and subsystem validation.

3. Culture and Cognition

Theoretical positions; Contemporary issues, Cultural influences on perception; Cognition, Learning, Memory, Problem solving, Reasoning and Creativity, Everyday cognition.

4. Culture and Emotion

Basic emotions, Dimensional and componential models, Subjective experiences Appraisal, Physiological reactions, and Emotional expressions.

5. Culture and Organizations

Work value, Commitment, Communication and

interpersonal dynamics, Manager techniques, Organisation development and change, Conflict negotiations.

6. Culture and Health

Psychopathology across cultures, Culture-bound syndromes and therapeutic model Cultural factors in health interventions.

7. Culture and Social Behaviours

Conformity, values, individualism-collectivism, gender roles and socialization processes.

8. Culture Change and Adaptations

Processes of acculturation, Acculturation in plural societies, Acculturation Strategies, Acculturation and adaptation of tribal/native peoples and refugees; Behavioural shifts and acculturative stress, Causal and moderating factors.

9. Cross-Cultural Communication

Verbal and non-verbal interactions, Communication incongruence, deceptions cultural display rules, formulating and managing intercultural interactions.

FOUNDATIONS OF APPLIED SOCIAL PSYCHOLOGY

Objectives :

1. To provide an understanding of the interface between society and psychology.
2. To develop understanding of social policies, social programmes and their evaluation.
3. To develop skills in the use of methods of research on applied social problems.

CONTENTS

1. Conceptual Bedrock

Concepts of social structure, social stratification and power; Ideology and social psychological enterprise. Locating the individual in society; psychosocial interface: Depth, social constructionist, Marxist, Frankfurt School and Gandhian perspectives; Practical theory; Notions of social anomalies and social problems.

2. Framework for Action (I)- Development and Policy

Paradigms and indicators of social development; Inequalities: Social, political and economic, their relationships and psycho-social consequences; Social policy: Definition and scope: Analysis of social policy in India; Planning as an instrument of socio-economic transformation in India.

3. Framework for Action (II)- Encountering the Field

Understanding the social situation; Characteristics of settings (e.g. Govt. agencies, NGOs, fourth estate, hospitals, educational institutions and community) as psycho-social action points; Areas and entry points for psycho-social practice; Psychologists in the field: Roles, obligations, rights and skills.

4. Methodological Foundations (I) - Action Research and Programme Evaluation

Characteristics of research in applied social psychology; Action research in professional and public life; Principles, of community based- action research; Setting the stage; Building the picture; Interpreting and explaining; Resolving the problems; Purpose of programme evaluation: Approaches to evaluation, assessing the needs for programme, assessing a programme's availability, assessing a programme's processes as services, assessing programmes.

5. Methodological Foundations (II)-Survey and Interview

Characteristics of survey; Survey mode, wording, format, and contexts; Sample selection procedures, Survey implementation, estimating survey accuracy, ethical issues in the use of surveys; Interviews: Processes and techniques.

DETAILED SYLLABUS

STATISTICS

M.Sc./M.A. (Prev.) Statistics Exam. 2004 & onwards

PAPER I MEASURE THEORY, PROBABILITY AND DISTRIBUTIONS.

- Unit 1** Sets, sequence of sets and their limits, Fields and sigma fields, Minimal sigma field, Monotone classes of sets, Borel sigma field. Set function, Continuity of set function, Measure function, properties of measure function, Probability measure, Caratheodory Extension Theorem of measure (Statement only). Lebesgue Measure and Lebesgue - Stieltjes measure.
- Unit 2** Measurable function - its descriptive definition and properties, simple and elementary functions, construction of measurable functions. Random variable, sequences of measurable functions and random variables.
Convergence of measurable function and Random variables - almost everywhere convergence, almost sure convergence, convergence in distribution (law). Helly - Bray Theorem (without proof).
- Unit 3** Borel - Cantelli lemma, Borel 0-1 law, weak & strong law of large numbers for independent random variables, Kolmogorov's inequality and theorem, Levy's inequality and Chebyshev's inequality.
- Unit 4** Central Limit Theorems : Lindberg-Levy Theorem, Laplace - Liapounoff Theorem, Lindberg - Feller Theorem (without proof) Characteristic functions, inversion theorem. Continuity Theorem and its application.

- Unit 5** Sampling Distribution of
- (i) Mean and Variance, Non - Central Chi-square, t and F and their properties.
 - (ii) Order statistics and sample range.
 - (iii) Sample correlation Coefficient.

PAPER-II REAL ANALYSIS AND STOCHASTIC PROCESS.

- Unit 1** Real valued functions, continuity of functions of one variable, uniform continuity. Differentiability, Mean value Theorem, Taylor's theorem with statements of various remainder terms.
Maxima - Minima of functions of many variables (Method of undetermined multipliers only).
- Unit 2** Fundamental theorem and Mean value theorem of integral calculus, Test of convergence of infinite integrals, uniform convergence of improper integrals, differentiations under the sign of integral.
- Unit 3** Multiple integrals and their evaluation by repeated integration, change of variables in multiple integration, Dirichlet's multiple integral.
Stochastic Processes : Its introduction (Definition & Examples) and classification into discrete/continuous time, discrete/continuous state spaces, types of stochastic processes with elementary problems.
- Unit 4** Markov Chains : Definition & examples of Markov chain Chapman - Kolmogorov equations, Calculation of n-step transition probability matrix and its limit, Stationary distribution classification of states, transient Markov chain.
- Unit 5** Random walk and Gambler's ruin problem. Idea's of Branching process, Poisson Process, Pure Birth Process, Pure Death Process, Birth & Death Process. Applications from social physical & Biological sciences.

PAPER - III LINEAR METHODS & DESIGN OF EXPERIMENTS.

- Unit 1** Finite dimensional vector spaces, existence of basis, Orthogonal matrices, Gram - Schmidt orthogonalisation method. Algebra of Matrices, rank and inverse of a matrix, solution of Linear equations. Generalised inverse of a matrix and its elementary properties.
- Characteristic roots & vectors of a matrix, Caley-Hamilton Theorem. Idempotent matrices. Real quadratic forms, rank & index, congruence of symmetric matrices, reduction of quadratic forms.
- Unit 2** **Linear estimations** : Linear models with assumptions on error components, estimable function, estimation & error spaces, Best Linear Unbiased Estimate (BLUE) for Linear functions of parameters, unified theory of BLUE and least square estimate.
- Unit 3** Testing of general liner hypothesis under normality of errors. Analysis of variance in general two-way classification. Missing plot techniques.
- Unit 4** General Block Design and its information matrix. Criteria of connectedness and orthogonality, Balanced and partially balanced design. Analysis of block designs. Extension to row-column designs. BIBD, recovery of inter & intra block informations in BIBD, Lattice Design, split plot design.
- Unit 5** General factorial experiments, factorial effects, best estimates and testing of the significance of factorial effects, study of 2 & 3 factor experiments

in randomised blocks. Complete & partial confounding, Fractional replication for symmetric factorials.

PAPER - IV ECONOMETRICS

- Unit 1** Nature of Econometrics, The General Linear Model ordinary least squares estimation and prediction. Use of dummy variables. Least squares estimates with restriction on parameters. Pure and mixed methods of estimation. Generalized least squares and prediction. Test of significance and confidence intervals, use of orthogonal polynomials.
- Unit 2** Heteroscedastic disturbances and its solutions. Autocorrelation, its consequences. Durbin-Watson test. Multicollinearity problem, its implication and tools for handling the problem. Ridge Regression.
- Unit 3** Residuals and their plots as a test for departure from assumptions such as fitness of model, normality, homogeneity of variances, detection of outliers and remedies. Selection of explanatory variables - use of R^2 , S^2 Mallows C_p statistics and stepwise regression.
- Unit 4** Linear regression with stochastic regressors. Error in variable model and instrumental variable estimation. Autoregressive linear regression. Distributed lag model.
Introduction to Non-linear models. Intrinsically non linear models. Linearization (Taylor's series) method of estimation of structural parameters.
- UNIT 5** Simultaneous linear equation model. Examples. Identification problems - restriction on structural parameters, Rank and order conditions. Estimation in simultaneous equation model. Indirect least squares, 2SLS estimators, General out line of LIML, K-class estimators, 3SLS and FIML estimators.

Paper - I

MICRO ECONOMIC ANALYSIS

Module 1: Introduction and Basic Concepts

Basic Economic Problem-Choice and Scarcity; Deductive and Inductive Methods of Analysis; Positive and Normative Economic Models; Characteristics of Equilibrium and Disequilibrium Systems.

Module 2: Demand Analysis

Elasticities(price, cross, income) of demand-theoretical aspects and empirical estimation elasticity of supply; Theories of Demand - Utility, Indifference Curve(income and substitution effects, Slutsky theorem, compensated demand curve) and their applications; Revealed Preference Theory; Revision of Demand Theory by Hicks; Characteristics of goods approach; consumer's

choice involving risk; Indirect utility functions(duality theory).

Module 3: Theory of Production and Costs

Production Function - short period and long period; law of variable proportions and returns to scale; Isoquants - Least cost combination of inputs; Returns to Factors; Economies of scale; Multi-product firm; Elasticity of Substitution; Euler's theorem; Technical progress and production function; Cobb-Douglas; Traditional and modern theories of costs - Empirical evidence; Derivation of cost functions from production functions; derived demand for factors.

Module 4: Price and Output Determination

Marginal analysis as an approach to price and output determination perfect competition - short run and long run equilibrium of the firm and industry, price and output determination, supply curve; Monopoly-short run and long run equilibrium, price discrimination, welfare aspects, monopoly control and regulation; Monopolistic competition - general and Chamberlin approaches to equilibrium, equilibrium of the firm and the group with product differentiation and selling costs, excess capacity under monopolistic and imperfect competition, criticism of monopolistic competition; Oligopoly-Non-collusive(Cournot, Bertrand, Edgeworth, Chamberlin, Kinked demand curve and Stackelberg's solution and collusive(Cartels and mergers, price leadership and basing point price system) models; Price and output determination under monopoly and bilateral monopoly; Workable Competition's Structure, conduct and performance norms.

Module 5: Alternative Theories of the Firm

Critical evaluation of marginal analysis; Baumol's sales revenue maximization model; Williamson's model of managerial discretion; Marris model of managerial enterprise; Full cost pricing rule; Bain's limit pricing theory and its recent developments including Sylos-Labini's model; Behavioral model of the firm; Game theoretic models.

Module 6: Distribution

Neo-classical approach - Marginal productivity theory; Product

exhaustion theorem; Elasticity of technical substitution, technical progress and factor shares; Theory of distribution in imperfect product and factor markets; Determination of rent, wages, interest and profit; Macro theories of distribution - Ricardian, Marxian, Kalecki and Kaldor's.

Module 7: Welfare Economics

Pigouvian welfare economics; Pareto optimal conditions; Value judgement; Social welfare function; Compensation principle; Inability to obtain optimum welfare - Imperfections, market failure, decreasing costs, uncertainty and non-existent and incomplete markets; Theory of Second Best - Arrow's impossibility theorem; Rawl's theory of justice equity-efficiency trade off.

Module 8: General Equilibrium

Partial and general equilibrium, Walrasian excess demand and input-output approaches to general equilibrium, existence, stability and uniqueness of equilibrium and general equilibrium, coalitions and monopolies; Production without consumption - one sector model, homogeneous functions, income distribution; Production without consumption - two sector model, relationship between relative commodity and factor prices(Stolper-Samuelson theorem), relationship between output mix and real factor prices, effect of changes in factor supply in closed economy(Rybozynski theorem), production and consumption.

M.A. (Previous)**Paper - II****QUANTITATIVE METHODS****Module 1: Mathematical Methods-1**

Concept of function and types of functions; Limit, continuity and derivative; Rule of differentiation; Interpretation of revenue, cost, demand, supply functions; Elasticities and their types; Multivariable functions; Concept and types of production functions; Rules of partial differentiation and interpretation of partial derivatives; Problems of maxima and minima in single and multivariable functions; Unconstrained and constrained optimization in simple economic problems; Simple problems in market equilibrium; Concept of integration; Simple rules of integration; Application to consumer's surplus and producer's surplus; Growth rates and simple properties of time path of continuous variables.

Module 2: Mathematical Methods-2

Determinants and their basic properties; Solution of simultaneous equations through Cramer's rule; Concept of matrix - their types, simple operations on matrices, matrix inversion and rank of a matrix; Concept of quadratic forms- Eigen roots and Eigen vectors; Introduction to input-output analysis; Difference equations - Solution of first order and second order difference equations; Applications in trade cycle models; Growth models and lagged market equilibrium models.

Module 3: Mathematical Methods-3

Linear programming - Basic concept; Formulation of a linear programming problem - Its structure and variables; Nature of feasible, basic and optimal solution; Solution of linear programming through graphical and simplex method; Statement of basic theorems of linear programming; Formulation of the dual of a programme and its interpretation; Concept of duality and statement of duality theorems; Concept of a game; Strategies - simple and mixed; Value of a game; Saddle point solution; Simple applications.

Module 4: Statistical Methods-1

Meaning, assumptions and limitations of simple correlation and regression analysis; Pearson's product moment and Spearman's rank correlation coefficients and their properties; Concept of the least squares and the lines of regression; Standard error of estimate; Partial and multiple correlation and regression (applications only); Methods of estimation of non-linear equations-parabolic, exponential, geometric, modified exponential, Gompertz and logistic relationships.

Module 5: Statistical Methods-2

Deterministic and non-deterministic experiments; Various types of events-classical and empirical definitions of probability; Laws of addition and multiplication; Conditional probability and concept of interdependence; Bayes theorem and its applications; Elementary concept of random variable; Probability, mass and density functions; Expectations, moments and moment generating functions; Properties(without derivations) of Binomial, Poisson and Normal distributions.

Module 6: Statistical Methods-3

Basic concept of sampling - random and non-random sampling; Simple random, stratified random and p.p.s. sampling; Concept of an estimator and its sampling distribution; Desirable properties of an estimator; Formulation of statistical hypotheses-Null and alternative; Goodness of fit; Confidence intervals and level of significance; Hypothesis testing based on Z, t, χ^2 (Chi-square) and F tests; Type 1 and Type 2 errors.

Paper-III

PUBLIC ECONOMICS

Module 1: Introduction

Role of Government in organized society; Changing perspective - government in a mixed economy; Public and Private sector, cooperation or competition; Government as an agent for economic planning and development; Government as a tool for operationalizing the planning process; private goods, public goods, and merit goods; Market failure - imperfections, decreasing costs, externalities, public goods.

Module 2: Rationale for Public Policy

Allocation of Resources - provision of public goods; Voluntary Exchange models; Impossibility of decentralized provision of

public goods (contributions of Samuelson and Musgrave); Stabilization Policy - Keynesian case for stabilization policy; Uncertainty and expectations; Failure of inter-temporal markets; Liquidity preference; Social goals; Poverty alleviation; Provision of infrastructural facilities, removing distributional inequalities and regional imbalances.

Module 3: Public Expenditure

Wagner's law of increasing state activities; Wireman-Peacock hypothesis; Pure theory of public expenditure; Structure and growth of public expenditure; Criteria for public investment; Social cost-benefit analysis - Project evaluation, Estimation of costs, discount rate; Reforms in expenditure budgeting; Programme budgeting and zero base budgeting.

Module 4: Taxation

Theory of Incidence; Alternative concepts of Incidence - Allocative and equity aspects of individual taxes; Benefit and Ability to pay approaches; Theory of optimal taxation; Excess burden of taxes Trade off between equity and efficiency; The problem of double taxation.

Module 5: Public Debt

Classical view of Public Debt; Compensatory aspect of debt policy; Burden of public debt; Source of Public Debt; Debt through created money; Public Borrowings and price level; Crowding out private investment and activity; principles of debt management and repayment.

Module 6: Fiscal Policy

Objectives of fiscal policy - full employment, anti-inflation, economic growth, redistribution of income and wealth; Interdependence of fiscal and monetary policies; Budgetary deficits and its implications; Fiscal policy for stabilization-automatic vs. discretionary stabilization; Alternative measures of resource mobilization and their impact on growth; distribution and prices; Balanced Budget Multiplier.

Module 7: Fiscal Federalism

Fiscal Federalism in India; Vertical and Horizontal Imbalance; Assignment of function and sources of revenue; Constitutional

provisions; Finance Commission and Planning Commission; Devolution of resources and grants; Theory of grants; Resource transfer from Union to States - Criteria for transfer of resources; Centre-State financial relations in India; Problems of states' resources and indebtedness; Transfer from Union and States to local bodies.

Module 8: Indian Public Finances

Indian Tax System; Revenue of the Union, States and local bodies; Major taxes in India; base of taxes, direct and indirect taxes, taxation of agriculture, expenditure tax, reforms in direct and indirect taxes, taxes on services; Non-tax revenue of Centre, State and local bodies; Analysis of Central and State government budgets; Lack of flexibility in Central and State budgets, shrinking size of development finance through budgets; Trends in public expenditure and public debt; Fiscal crisis and fiscal sector reforms in India; Reports of Finance Commissions in India.

Paper - IV

ECONOMICS OF GROWTH AND DEVELOPMENT

Module 1: Economic Growth-1

Economic growth and development - Factors affecting economic growth: capital, labour and technology; Growth models - Harrod and Domar, instability of equilibrium; Neo-classical growth models - Solow and Meads, Mrs. Joan Robinson's growth model; Cambridge criticism of Neo-classical analysis of growth, The capital controversy.

Module 2: Social and Institutional Aspects of Development

Development and underdevelopment - Perpetuation of underdevelopment; Poverty - Absolute and Relative; Measuring development and development gap - per capita income, inequality of income, Human Development Index and other indices of development and quality of life - Food security, education, health and nutrition; Human Resource Development; Population problem and growth pattern of population - Theory of Demographic Transition; Population as limits to growth and as ultimate source-Population, poverty and environment; Economic Development and institution-markets and market failure, state and state failure, issues of good governance.

Module 3: Theories of Development

Classical theory of development - contributions of Adam Smith, Ricardo, Malthus and James Mill; Karl Marx and development of capitalistic economy - theory of social change, surplus value and profit; Immutability laws of capitalist development; Crisis in capitalism - Schumpeter and capitalistic development; Innovation - role of credit, profit and degeneration of capitalism; Structural analysis of development; Imperfect market paradigm.

Module 4: Approaches to Development

Partial theories of growth and development - vicious circle of

poverty, circular causation, unlimited supply of labour, big push, balanced growth, unbalanced growth, critical minimum effort thesis, low-income equilibrium trap; Dualism-technical, behavioral and social; Rains and Fei model; Dixit and Marglin model, Kelly et al Model; Dependency theory of development; Structural view of development.

Module 5: Sectoral Aspects of Development

Role of Agriculture in economic development; Efficiency and productivity in Agriculture, New technology and sustainable agriculture; Globalization growth; Rationale and pattern of industrialization in developing countries; The Choice of Techniques and appropriate technology and employment; Efficiency of small-scale vs. large-scale production; Terms of trade between agriculture and industry; Infrastructure and its importance; Labour markets and their functioning in developing countries.

M. A. (Final)**Paper - IV****ECONOMICS OF SOCIAL SECTOR AND ENVIRONMENT****Module 1: Welfare Economics, Social Sectors and Environment**

Pareto optimality and competitive equilibrium; Fundamental theorems of welfare economics; Externalities and market inefficiency - externalities as missing markets; property rights and externalities, non-convexities and externalities; Pareto optimal provision of public goods-Lindahl's equilibrium, preference revelation problem and impure and mixed public

goods, common property resources.

Module 2: Measurement of Environment Values

Use values; Option values and non-use values; Valuation methods - Methods based on observed market behaviour; Hedonic property values and household production models (travel cost method and household health production function), Methods based on response to hypothetical markets, contingent valuation methods.

Module 3: The Theory of Environmental Policy

Environmental externalities-Pigouvian taxes and subsidies, marketable pollution permits and mixed instruments (the charges and standards approach), Coase's bargaining solution and collective action; Informal regulation and the new model of pollution control, Monitoring and enforcement of environmental regulation, Environmental institutions and grass root movements; Global environmental externalities and climatic change-Tradable pollution permits and international carbon tax, Trade and environment in WTO regime.

Module 4 : Economics of Natural Resource Management and Sustainable Development

Theories of optimal use of exhaustible and renewable resources; Environmental and development trade off and the concept of sustainable development; Integrated environmental and economic accounting and the measurement of environmentally corrected GDP; Macroeconomic policies and environment.

Module 5 : Environmental and Natural Resource Problems in India

Mechanism for environment regulation in India; Environmental laws and their implementation; Policy instruments for controlling water and air pollution and forestry policy; People's participation in the management of common and forest lands; The institutions of joint forest management and the joint protected area management; Social forestry - rationale and benefits.

Module 6: Economics of Education

Education as an instrument for economic growth; Human capital - Human capital vs. Physical capital, components of human capital; Demand for education - private demand and social demand,

Determinants of demand; Cost of Education - Expenditure on education, private costs and social costs and wastage and stagnation; Benefits of education - Direct and indirect benefits, private and social benefits; Educational planning and economic growth - Cost-benefit analysis, production function models, growth accounting equations of Schultz and Denison, Manpower requirements approach, programming and input-output models; Educational financing - Resource mobilization and utilization, pricing and subsidies and effects of educational financing on income distribution; Education and labour market - Effects of education, ability and family background on earnings, poverty and income distribution, education and employment; Economics of educational planning in developing countries with special emphasis on India.

Module 7: Health Economics

Health dimensions of development; Determinants of health - poverty, malnutrition and environmental issues; Economic dimensions of health care - demand and supply of health care; Financing of health care and resource constraints; The concept of human life value; Theory and empirical studies of production of health care; Inequalities in health - class and gender perspectives; Institutional issues in health care delivery.

INDUSTRIAL ECONOMICS

Module 1: Framework and Problems of Industrial Economics

Concept and organization of a firm - ownership, control and objectives of the firm; Passive and active behaviour of the firm.

Module 2: Market Structure

Sellers' concentration; Product differentiation; Entry conditions;

Economies of scale; Market structure and profitability; Market structure and innovation; Theories of industrial location - Weber and Sargent Florence; Factors affecting location.

Module 3: Market Conduct

Product pricing - Theories and evidence; Investment expenditure - Methods of evaluating investment expenditure; Theories and empirical evidence on Mergers and acquisitions (M & As) and diversification.

Module 4: Market Performance

Growth of the firm - Size and growth of a firm; Growth and profitability of the firm; Constraints on growth; Productivity, efficiency and capacity utilisation - Concept and measurement, Indian situation.

Module 5: Indian Industrial Growth and Pattern

Classification of industries; Industrial policy in India - Role of public and private sectors; Recent trends in Indian industrial growth; MNCs and transfer of technology; Liberalization and privatization; Regional industrial growth in India; Industrial economic concentration and remedial measures; Issues in industrial proliferation and environmental preservation; Pollution control policies.

Module 6: Industrial Finance

Owned, external and other components of funds; Role, nature, volume and types of institutional finance- IDBI, IFCI, SFCs, SIDC, commercial banks, etc.; Financial statement - Balance sheet, Profit and loss account; assessment of financial soundness, ratio analysis.

Module 7: Project Appraisal

Cost-benefit analysis - Net Present Value(NPV)and internal rate of return(IRR) criteria - balancing private and social returns.

Module 8: Industrial Labour

Structure of industrial labour; Employment dimensions of Indian industry; Industrial legislation; Industrial relations; Exit policy and social security; Wages and problem of bonus - labour market reforms.

Module 9: Current Problems of Selected Industries

Iron and Steel; Cotton textiles; Jute; Sugar; Coal; Cement and engineering goods; Development of small-scale and cottage industries in India.

M. A. (Final)**Optional Paper****ECONOMETRICS****Module 1: Basic Econometrics**

Nature, meaning and scope of econometrics; Simple and general linear regression model - Assumptions, Estimation (through OLS

approach) and properties of estimators; Gauss-Markov theorem; Concepts and derivation of R^2 and adjusted R^2 ; Concept and analysis of variance approach and its application in regression analysis; parabolic, exponential, geometric, hyperbolic, modified exponential; Gornetz and logistic functions.

Module 2: Problems in Regression Analysis

Nature, test, consequences and remedial steps of problems of heteroscedasticity; Multicollinearity and auto-correlation; Problems of specification error; Errors of measurement.

Module 3: Regressions with Qualitative Independent Variables

Dummy variable technique - Testing structural stability of regression models comparing to regression, interaction effects, seasonal analysis, piecewise linear regression, use of dummy variables, regression with dummy dependent variables.

Module 4: Dynamic Econometric Model

Autoregressive and distributed lag models - Koyak model, Partial adjustment model, adaptive expectations; Instrumental variables; Problem of auto-correlation - Application; Almon approach to distributed-lag models.

Module 5: Simultaneous Equation Models

Introduction and examples; The simultaneous equation bias and inconsistency of OLS estimators; The identification problem; Rules of identification - order and rank conditions; Methods of estimating simultaneous equation system; Recursive methods and OLS; Indirect least squares(ILS); 2SLS, 3SLS, and ML methods-Applications.

Module 6: Time Series Analysis

Stationarity, unit roots, co-integration-spurious regression, Dickey-Fuller test, Engle-Granger test, Random walk model, Forecasting with ARIMA modelling; Box-Jenkins methodology; Vector autoregression; Problems with VAR modelling-Applications; Time varying parameters and Kalman filter.

Module 7: Multivariate Analysis

Multivariate probability distribution, marginal and conditional probability distribution, multivariate normal distribution and its properties; Hotelling T-scale; Discriminant analysis.

EDUCATIONAL TECHNOLOGY

COURSE OBJECTIVES :

1. To enable the students teacher to understand about the meaning, nature, scope and significance of E.T. and its important components in terms of Hardware and Software.
2. To help the students teachers to distinguish between communication and insturction so that they can develop and design a sound instructional system.
3. To acquaint students teachers with levels, strategies and models of teaching for future improvement.
4. To enable the students teachers to understand about the importance of programmed instructions and researches in E.T.

5. To acquaint the student teachers with emerging trends in ET along with the resources centres of E.T.

UNIT I

- Concept of Educational Technology
- Meaning, Nature, Scope and significance of ET.
- Components of ET : Software, Hardware.
- Educational technology and instructional technology.

UNIT II

- Communication and Instruction :
- Theory, concept, Nature, Process, Components Types, Classroom Communication, Mass media approach in Educational Technology.
- Designing Instructional system :
- Formulation of instructional objectives
- task analysis
- designing of Instructional strategies such as lecture, team teaching discussion, seminar and tutorials.

UNIT III

- Teaching levels, Strategies & Models :
- Memory, Understanding and Reflective levels of teaching.
- Teaching Strategies : Meaning, Nature, Functions and Types
- Models of teaching : Meaning, Nature, Functions and Types (Psychological Models and Modern Models of Teaching)
- Modification of teaching behaviour.
- Micro teaching, Flander's Interaction Analysis, Simulation.

UNIT IV

- Programmed instruction (linear/branching model) - Origin and types - linear and branching.
- Development of the programmed instruction material
- teaching machines
- Computer, Assisted Instruction

- Research in Educational Technology
- Future priorities in Educational Technology.

UNIT V

- Educational Technology in formal, non formal and Informal Education, Distance Education, Open Learning Systems and Educational Technology.
- Emerging trends in Educational Technology, Videotape, Radio-vision, tele-conferencing, CCTV, CAI, INSAT - Problems of New Technologies.
- Evaluation and Educational Technology.
- Resource Centres for Educational Technology, CIET, UGC, IGNOU, NOS, State ET Cells, AVRC, EMRC, NIST etc. - their activity for the improvement of teaching - learning.

Geographical Concept And Research Methodology

Course Contents :

- Unit - I** The nature of Geography- from the earliest time to the present day. Trends in Geographical thought (i) Concept of Earth Surface (ii) Landscape analysis (iii) Spatial organization (iv) System analysis.
- Unit - II** Concept of region and regionalism -regions of different types and hierarchies, concept of core and marginal areas, concept related to man and environment, relationship-determinism, adaptation, Possiblism, perception of environment, concept relating to city country functional relationship, umland (urban-field.)
- Unit - III** Research Methodology-Meaning and objective of research, types and approaches, research process, problems encountered by researchers in India, Defining research problem, research design, sampling design.
- Unit - IV** Processing and Analysis of data-Methods of measuring concentration and dispersion of human and economic activities, hierarchy of central places and Neighbour analysis, chi-square test, Binomial test, Application of remote sensing techniques.
- Unit - V** Hypothesis testing-Needs and types of hypothesis, goodness of fit and significance and confidence levels, parametric and non-parametric procedures, Analysis of variance (ANOVA).

Paper - V(b) Geographic Information System and Computer Mapping M.M.-100

Course Contents :

- Unit - I** Spatial Science: Geography as a spatial science, maps and spatial information, dynamics of spatial information, elements of information technology, geographic objects and their relations-definition and development of GIS, computer environment for GIS.
- Unit - II** Spatial Data: Elements of spatial data; data sources: Primary and secondary, census and sample-data; quality and error variations-raster and vector data structures data conversion-comparison of raster and vector databases-methods of spatial interpolation-GIS data formats for the computer environment.
- Unit - III** Elements of GIS : Data capture-verification and preprocessing -data storage and maintenance of data bases-Database Management systems: Types and

merits and demerits-data manipulation, analysis (integrated analysis of spatial and attribute data , overlay analysis, neighbourhood operations and connectivity functions) and spatial modelling -output format and generation

Unit - IV GIS Technology: Coordinate system-basic principles of cartography and computer assisted cartography for GIS-remote sensing data as a data source for GIS and integration of GIS and Remote Sensing-GPS and GIS: technology, data generation and limitations-visualization in GIS-Digital Elevation Models (DEM and TINS).

Unit - V GIS application: GIS as a Decision Support System -expert system for GIS-basic flow chart for GIS application-GIS standards, legal system and national GIS policy application of GIS in Land information System, Urban Management, Environmental Management and Emergency Response System.

Geography Of Rural Settlements**Course Contents :**

- Unit - I** Nature, scope, significance and development of settlement geography; Approaches to rural settlement geography, human settlement as a system, Rural-urban continuum. Histogenesis of rural settlements: Spatio-temporal dimensions and sequent occupance. Definition and characteristics of rural settlements in the fringe areas and sparsely settled areas. Distribution of Rural settlements: Size and spacing of rural settlements.
- Unit - II** Types, forms and Patterns of rural settlements: cause and effect; Functional classification of rural settlements: Central places and rural service centres; their nature, hierarchy and functions; rural-urban fringe-structure, characteristics and functions.
- Unit - III** Social issues in rural settlements: poverty, housing and shelter, deprivation and inequality; empowerment of women, health care; Rural-urban interaction.
- Unit - IV** Environmental issues in rural settlements; access to environmental infrastructure: water supply, sanitation, drainage, occupational health hazards.
- Unit - V** Cultural landscape elements in rural settlements in different geographical environments with special reference to India: House types and field patterns, Origin, evolution, size, socio-spatial structure of Indian Villages. Rural development planning in India; Integrated Rural Development.

Paper - V (d) Geography of Tourism

M.M.-100

Course Contents :

- Unit - I** Basics of tourism: Definition of tourism, Factors influencing tourism: historical, natural, socio-cultural and economic; motivating factors for pilgrimages: leisure, recreation; elements of tourism, tourism as an industry.

- Unit - II** Geography of tourism: its spatial affinity; areal and locational dimensions comprising physical, cultural, historical and economic; Tourism types: cultural, eco-ethno coastal and adventure tourism, national and international tourism; globalization and tourism.
- Unit - III** Indian Tourism: regional dimensions of tourism attraction; evolution of tourism, promotion of tourism
- Unit - IV** Infrastructure and support system-accommodation and supplementary accommodation; other facilities and amenities; Tourism circuits-short and long distance-Agencies and intermediaries - Indian hotel industry.
- Unit - V** Impacts of tourism: physical, economic and social and perceptual positive and negative impact. Environmental laws and tourism-Current trends, spatial patterns and recent changes; Role of foreign capital & impact of globalization on tourism. Project report on relevant topics such as impact of tourism on Garhwal Himalaya, Dal Lake, Goa and North East India, impact on a historic city.

PAPER - VI : PRACTICAL

M.M. 100

- (A) **Lab Work Exercises** : 50 Marks
- (i) **Map projection** : Sinusoidal, Mollweide's, Mercators and Gall's Stereographic projections, International Projection, Interrupted Mollweide and Sinusoidal projections, Gnomonic Equatorial and Oblique zenithal projection.
 - (ii) **Geological Maps, slope analysis and Profiles** - Use of these technology in the study of geomorphic landscapes. Remote sensing as a tool for data generation and mapping computer & cartography. Elementary knowledge of G.I.S.
 - (iii) **Maps and Diagram** - Drawing of maps using dot, Shade,

symbol methods, isopleths and chropleths representing population agricultural industrial and transport data.

- (iv)(a) Statistical Methods - Measures of Dispersion - Quartile range, Variance and co-efficient of Variation, Correlation and Co-efficient of correlation, Regression line, Co-efficient of Skewness, student 'T' Test, Chai square test.
- (b) Graphical Representation of Statistical Data - Lorenz curve, thissen Polygon, Scatter Diagram, Location quotient curve.

Note: Question will be set on all the four topics mentioned above and the candidates will be asked to attempt three questions in three hours.

- (B) Excursion and Field Report : **30 Marks**

A geographical excursion of about 2 weeks or 10 days duration will be undertaken (in batches of 10/20 students and 1/2 teachers one attendant per party) with a view to study the inter-regional variation of the country. Each student will prepare a report supported by maps, diagrams, data and photographs.

Note:

- (1) In a very special circumstances a student may be permitted to submit a field study report of a revenue village or a ward of a city in lieu of geographical excursion prior permission from the Head of the department and the Principal will be sought for this alternative arrangement.
- (2) The T.A., D.A. and other expenses on teachers and attendant will be met out by the college.
- (C) Record Book and Viva **20 Marks**

Books Recommended

M.A./M.Sc. (Final)**PAPER-II:****M.M. 100****REGIONAL PLANNING AND DEVELOPMENT****Course Contents :**

- Unit - I** Regional concept in geography, conceptual and theoretical framework, merits, and limitations for application to regional planning and development; changing concept of the region from an inter-disciplinary view-point, concept of space, area and locational attributes.

Types of regions : Formal and functional; uniform and nodal, single purpose and composite region, in the context of planning; regional hierarchy; special purpose regions.

- Unit - II** Physical regions, resource regions, regional division according to variations in levels of socio-economic development ; special purpose regions-river valle regions, metropolitan regions, problem regions-hill regions, tribal regions, regions of drought and floods.
- Unit - III** Approaches to delineation of different types of region and their utility in planning.
Planning process - sectoral, temporal and spatia

dimensions ; short-term and long term perspective planning. Planning for a region/Es development ; multi-regional planning in a national context. Indicators of development and their data sources. Measuring levels of regional development ; disparities-case study of India.

Unit - IV Regional development strategies-concentration dispersal, case studies for plans of developed & developing countries, Regional plans of India.

Unit - V Concept of Multi-level planning; decentralised planning; peoples participation in the planning process; Panchayati Raj system; role and relations of Panchayati Raj Institutions (Village Panchayat Panchayat Samithi and Zila Parishad) & administrative structure (village, Block and District). Regional development in India-problems & prospects.

PAPER-II:

POPULATION GEOGRAPHY

M.M. 1

Course Contents :

- Unit - I Population Geography :** Meaning, scope a Objectives; development of Population Geograph Population Geography and Demography-sources population data, their level of reliability, and problem of mapping of population data.
- Unit - II Population distribution :** density and growt theoretical issues; Classical and modern theories population distribution and growth; World patter and their determinants; India: populatic distribution density and growth profile, Concepts under population and over population.
- Unit - III Population composition :** age and Sex; literacy ar education; religion, caste and tribes; rural and urban occupational structure; gender issues; Popualtio composition of India.
- Unit - IV Population dynamics :** Measurements of fertilit and mortality. Migration : national and internationa patterns; India's population dynamics.

Unit - V Population and development : population - resource regions and levels of population and socio-economic development; population policies in developed and less developed countries; Human Development Index and its components; India's population policies, population and environment; implications for the future.

ADVANCED CARTOGRAPHY

Course Contents :

- Unit - I** Introduction - Trends in the development
cartographic techniques for descriptive, analytical &
prescriptive aspects in the use of maps.
- Unit - II** Thematic Cartography-Physical:
1. Assessment of land quality by using differ
attributes in the evolution of landforms &
measuring their association and spat
differentiation.
2. Land based resources and cover and land use.
- Unit - III** Thematic cartography - Socio - economic: data source
and techniques of analysis of socio-economic da
through the preparation of single purpose an
composite maps.

Unit - IV Creation of spatial database and application using
GIS, Remote sensing and Computer cartography.

Unit - V Regional Synthesis and characterization of the
observed spatial patterns for predictive purposes.
Preparation of spatial models; cartography for
environmental education and planning.

M.M.I

(A) : CULTURAL GEOGRAPHY

Course Contents :

- Unit - I Introduction :** Nature and scope of cultural geography; Definition, cultural element as components of culture; convergence and divergent processes; cultural changes: perceptual behaviouralism and cultural relativism.
- Unit - II Cultural Diversity :** Bases of cultural diversity-race, religion and language. Cultural diversity in world cultural diversity and regionalization in India.

- Unit - III** Geography of ethnic groups and tribal groups. Religion and its diffusion; diffusion of ethnic traits in world as well as in India; ethnic landscape and economy of the area; Diffusion in folk geography; cultural landscape and cultural ecology in folk geography; Religions : origin, diffusion and spatial distribution; religion & economic development.
- Unit - IV** Patterns of livelihood: various economic activities & cultural adaptations ; agriculture, industrialization and modernization; technological changes and their geographic implications.
- Unit - V** Human settlements : Relation to ideology, social structure and technology, social structure and technology, pattern of rural & urban society, social processes in the city, the city in the developing countries.

PAPER-1 MODERN INDIAN POLITICAL THOUGHT

Course Rationale :

The purpose of this paper is to generate a critical awareness about the distinctive features of the political theory tradition in modern India. The focal theme of the paper is the bearing of Indian philosophical systems of thought on social and political ideas and to what extent is Indian Political thought rejection, derivative-imitation or innovative-transformation of western Political thought. It is an attempt to discuss systematically the political ideas of various political and social leaders and thinkers in modern India. It emphasizes on the distinctive contribution of modern Indian thinkers to political theorizing and the relative autonomy of Indian political thought.

Course Content :

1. Overview of Indian Political Thought: Genesis and Development.
2. The Indian Renaissance and Ram Mohan Roy to Vivekananda.
3. The Debate between the Moderates and the Extremists.
4. Revolutionary Nationalism.
5. Liberalism

PAPER-II WESTERN POLITICAL THEORY

Course Rationale :

This paper focuses on the nature and significance of political theory as it evolved and analyzes its contemporary relevance. It explains the continuing

significance of the study of the classics and indicate its shortcomings by underlining the need to incorporate new perspectives that have arisen in recent past. The different interpretations that a political theory text is subjected to are scrutinized. Furthermore the debate about the decline and the subsequent reasons for revival of political theory is examined. In addition the claims about the end of ideology and the end of history is critically analyzed.

Course Content :

1. Nature and Significance of Political Theory
2. Importance of the Classical Tradition
3. Different Interpretations in Political Theory
4. Limitations of the Classical Tradition

PAPER-III INDIAN GOVERNMENT AND POLITICS

Course Rationale :

The social and economic processes that underlie the functioning of the political system in India are the focus of this paper. One needs to understand that the Indian Constitution was intended to provide a framework for a modern, secular and democratic society and simultaneously perform the onerous task of bringing about development in an relatively impoverished and backward country. This hope and subsequent relative success and failure has to be analyzed in detail. The experience of last fifty year and the new challenges ahead in the context of globalization, liberalization and greater democratic expansion from below needs to be examined.

Course Content:

1. Background of the Constituent Assembly: Composition and Working
2. Ideological Contents : Preamble, Fundamental Rights and Directive Principles of State Policy.
3. Constitution as an Instrument of Social Change Amendment Process .
4. Federalism and its Working with reference to Centre-State relations, and demands for state autonomy.

PAPER - I CONTEMPORARY POLITICAL ISSUES

Course Rationale :

Social, economic, cultural and humanitarian concerns have come to the forefront relegating issues of security to the background in the most well established democracies in the post Cold War period. These concerns also find their advocates in the relatively underdeveloped countries of the Third World. There is a need to examine to what extent are these concerns new or are they a redefinition of old ideas with a fresh look. The objective of this paper is to examine critically these concerns and analyze their impact on the course of world politics and policy-making initiatives both globally and within individual countries.

Course Content :

1. Factors leading to the end of the Cold War
2. Contemporary Issues in Post Cold War period
3. Key Issues in North South Relationship
4. Globalization
5. Gender Issues
6. Environmental Issues
7. Human Rights
8. Terrorism
9. Nature of the State and the Liberalization Process
10. Development Issues

PAPER - IV (a) ANCIENT INDIAN POLITICAL THOUGHT

Course Content :

Political philosophy in India unlike its counterpart in the West, which is concerned with the relationship between the individual and the State, has focused on issues of self-liberation, morality and leadership. This paper critically analyzes and studies the different aspects of political theory in ancient India with the purpose of establishing affinities and dissimilarities with that of the tradition in the West. The rich diversity of ancient Indian political thought, which is manifest in a number of different forms from the Buddhist innovations, the Arthashastra tradition to the Shanti Parva of the Mahabharatha are to be

highlighted.

1. Interpretations of Ancient Indian Political Thought-Methodological Issues and schools of thought.
2. Political Philosophy of Vedanta ú basic concepts, evolution character and interpretations
3. Buddhist Political Philosophy-basic concepts, evolution character and interpretations.
4. Political ideas in Kautilya/Éa Arthashastra, the Saptaparv (Rajdharm), the law Book of Manu, Kamandaka Nitisar, Caste and Dharma.
5. Elements of the State: the Saptanga Theory as inter-state relations, Mandala theory.
6. Theories of the Origin of the State: Theory of Property, Family and Varna regarding the origin, the contract theory and other theories.
7. Vedic Popular assemblies: Sabha, Samiti, Gana and Vidatha.
8. Republics (tribal and oligarchical republics, nature of republican administration) and Kingship (forms and type, Divine theory, training of the Prince, functions of the king, Limitations on Monarchy, Council of Minister).

Classical Sociological Tradition

Objectives :

Industrial Revolution and consequent transformation of mode of production brought out dramatic and traumatic changes in the traditional feudal structure of the societies in Europe through the emergence of capitalism. The changes that were brought by these events which have had far-reaching effects on the economic and social systems of these societies that they commanded attention of thinkers. That gave rise to the discipline of Sociology. Different thinkers viewed the societal changes from different perspectives, presented their distinct analysis, casual and otherwise of these changes made efforts to highlight the different features of the emerging modern industrial capitalist society and also attempted to predict the future of this society. Some of them engaged their attention on the issues related to development of Sociology as a Science. They laid down the theoretical foundations of Sociology on which edifice of modern Sociological theories is erected. Besides, they also tried to analyse and interpret other sociological issues such as education, power structures, religion and the like. Among these Sociological thinkers prominent are Karl Marx, Emile Durkheim, Max Weber and Vilfredo Pareto.

Acquaintance with the writings of these four thinkers would equip the students with theoretical insights to know, analyse and interpret the social scenario around them and would also familiarize them with the different sociological perspectives and theories. While teaching, emphasis should be on critical analysis of the writing of these four thinkers.

Methodology of Social Research

Objectives:

This course plan aims to provide exposure to th fundamentals of various research techniques ar methods (both quantitative and qualitative). It tries

build upon the basic assumptions in adopting different methodologies for different kinds of research themes. In the first section, it introduces certain philosophical ideas underlying the emergence of different methodologies in social sciences. The second and third sections attempt to sensitize post-graduate students to develop a critical outlook at the existing perspectives and methods and to evolve conceptual clarity, which can lead them in their future research. Teaching certain quantitative methods, statistical techniques and qualitative methods to collect and analyze the data would help them organize and analyze the information gathered by them. Exposure to the fieldwork at the post-graduate level is intended to enhance the research interests and inculcate the spirit of inquiry among students who may be motivated to continue higher studies in research.

Unit 1-

Philosophical Roots of Social Research

Issues in the theory of epistemology: forms and types of knowledge, validation of knowledge
 Philosophy of social science: Enlightenment, reason and science, Cartesian philosophy, structure of scientific revolution (Kuhn)
 Positivism and its critique: Contributions of Comte, Durkheim and Popper to positivism; Critique of positivism: Fayeraband and Giddens
 Hermeneutics: inductive analysis, experiments in ethno-methodology, because of - and in order to - motive in phenomenological sociology.
 Methodological Perspectives in Sociological Theory:

Unit 2-

Nature of of Social Reality and Approaches to it:

Positivism, Phenomonology, Ethnomethodology and Symbolic Interactionism, Interpretative understanding.
 Logic of Inquiry in social science research
 Inductive and deductive
 Theory building
 Scientific method in social research
 Objectivity/value neutrality

- Hypothesis
- Unit 3-** quantitative methods and survey research
Assumptions of quantification and measurement
Assumptions of qualification and measurement
Survey techniques
Operationalisation and research design
Sampling design
Questionnaire construction, interview schedule
Measurement and Scaling
Reliability and Validity
Limitations of Survey
- Unit 4-** **Statistics in social research**
Measures of central tendency: Mean, Median, Mode
Measures of Dispersion: Standard/Quartile Deviation
Correlational Analysis: Tests of Significance and Covariance
Regression Analysis
- Unit 5-** **Qualitative Research Techniques**
Techniques and methods of qualitative research.
Participant observation/ethnography, interview guide
Case study method
Content analysis
Oral history, narratives
Life history, genealogy
Methodological dilemmas and issues in qualitative research
Encounters and experiences in field work.
Qualitative data format and processing.
Validity and reliability in qualitative research.
- Unit 6-** Methods and use of macro-statistics and secondary sources (Durkheim's suicide, census, NSS).
Triangulation - Mixing qualitative and quantitative methodologies
Social Research, Action Research, Participatory Research
Application of Computers in Social research (e.g. SPSS)
Ethical Issues in Social Research

Pedagogy :

It may be noted that the course plan is sufficiently broad based to divide it into two courses: Or one course may be culled out depending on the desired thrust and focus.

This course, especially the first section, is communicating the message that methodologies and methods do not evolve or emerge in a vacuum. Thus, the teacher is expected to constantly connect research methods to a theoretical framework so as to explain explicitly the linkages between theory and practice.

Discussions and practical exercises may form an integral part of the course. Daily discussion on specific topic among students will provide feedback to the teacher and also arouse the interest of the students.

A field visit may also be organized depending upon the resources, time and convenience. Students may be made to do exercises in class such as the construction of questionnaires, schedules etc. and also test them in the field so as to sharpen their research skills. The section on statistics should also be rigorously explained along with adequate exercises.

Paper III

PERSPECTIVES ON INDIAN SOCIETY

Objective :

It is hoped that students will have acquired a fairly adequate and comprehensive understanding of Indian society in all its multi-faceted dimensions at the graduate level. This course is aimed at sensitizing them to the diversity as well as inter-connectedness of theoretical perspectives on Indian society, thereby adding depth as well as insight to their understanding of the subject.

Unit 1 - Course Outline :

Conceptualizing Indian society in terms of certain distinctive characteristics and configurations; the scale and magnitude of cultural diversity (religious beliefs and rituals, institutions, cultural patterns, linguistic diversity); linkages and networks binding regions, groups and communities; continuity between past and present in institutions, cultural and behavioural patterns; the village as the nucleus of Indian society; social hierarchy (caste system)

The colonial context: the representation of Indian society as fragmentary and static in colonial ethnography; the census, district gazeteers and the imperial gazeteer as instruments of colonial policy; the colonial legacy in Sociology and Social Anthropology in the post-Independence period; academic neo-colonialism; Americanization of sociology.

Unit 2 - Theoretical perspectives :

Indological /Textual (G.S.Ghurye, Louis Dumont) Structural-functionalism (M.N. Srinivas, S.C. Dube) Marxism (D. P. Mukherjee, A. R. Desai, R. K. Paper IVth - 'D'

Criminology

Objectives :

With the fast tempo of change in contemporary society, the crime scene is also changing fast. The eruption of violent crimes, organized crimes, white-collar crimes, crimes against women and children, and above all cyber crimes is compelling enough to warrant the study of crime, its control and prevention. Significant advances have taken place recently in the study of crime and its control, generating important theoretical formulations and policy perspectives. Hence the relevance of the course on criminology.

The course is designed to acquaint the students with: recent advances in criminology; changing profile of crime and criminals, particularly in India; prison reforms in India; correctional measures and programmes in prisons; alternatives to imprisonment; and victimology and its implications for crime control and prevention to prepare the students for professional roles of correctional agents in agencies of criminal justice administration, particularly in prisons and correctional institutions.

Course Outline :

- Unit 1-** Conceptual Approaches to Crime: legal, behavioral and sociological; deviance, crime and delinquency; types of crime economic, violent, white-collar
- Unit 2-** Perspectives on Crime Causation: classical, positivist, psychological, sociological, marxian, geographical; recent theoretical advances - the criminal personality, labelling theory

Unit 3- Changing Profile of Crime and Criminals: organized crimes, crimes against women and children, cyber crimes, corruption, changing socio-economic profile of criminals in contemporary India

Unit 4- Theories of Punishment: retributive, deterrent, reformatory, futility and cost of punishment
Correction and its Forms: meaning and significance of correction; forms of correction prison-based, community-based
Correctional Programmes in Prisons: history of prison reforms in India, national policy on prisons; scientific classification of prisoners; modernization of prison industry and involvement of private sector; correctional programmes - educational, vocational, psychiatric, meditation, recreation, etc; New Delhi Model of Correction

Unit 5- Problems of Correctional Administration: antiquated jail manual and prison act overcrowding, custodial mind set; lack of inter-agency coordination among police, prosecution, judiciary and prison; human rights and prison management, limitations and prospects of correction
Alternatives to Imprisonment : probation, parole, open prisons, after-care and rehabilitation
Victimological Perspective: victim's responsibility in crime, compensation to victims.

Pedagogy:

The students should be provided an opportunity to observe the working of the police, judiciary and prisons of the region. They should be taken to modern jails, reformatories, Borstal Homes and Drug De-addiction Centres to see for themselves the working of these institutions and to interact with both the staff and the inmates of these institutions. Special sessions may also be organized for interaction with some of the leading and knowledgeable functionaries of the criminal justice administration system. All this will go a long way to stimulate their interest in the study of the course.

M.A II (Final) - Sociology**Paper Ist****Theoretical Perspectives in Sociology****Objectives:**

This course is intended to introduce the students to the substantive, theoretical and methodological issues which have shaped the sociological thinking in the latter half of the 20th century, and which continue to concern the practitioners of sociology today. The main focus of this course will be on structural, functional, and conflict theories, and symbolic interactionism, phenomenology, ethnomethodology and neomarxism. The course will also examine the theoretical relevance and analytical utility of the premises, methodology and conclusions of these diverse theoretical perspectives in understanding social structure and change.

Pedagogy :

The biographical details of the sociologists mentioned may be used only to place their theoretical contributions in appropriate intellectual contexts. It is necessary to evaluate the relevance and significance of the perspectives listed for understanding society in general and society in India in particular. Illustrations may be drawn from empirical studies influenced by or bearing on these perspectives.

Paper II

SOCIOLOGY OF CHANGE AND DEVELOPMENT

Objectives :

Social change has always been a central concern of sociological study. More recently, it has gained in greater salience partly because of its unprecedented rapidity and partly because of its planned character. Not surprisingly, development has emerged as a pronounced concern and as a remarkable feature of our times. Accordingly, the relevance of the course 'Sociology of Change and Development' can hardly be overemphasized.

The course is designed to achieve the following objectives:

- to provide conceptual and theoretical understanding of social change and development as it has emerged in sociological literature;
 - to offer an insight into the ways in which social structure impinges on development and development on social structure; and
 - to address in particular the Indian experience of social change and development.
- to prepare the students for professional careers in the

field of development planning, including governmental, non-governmental and international agencies engaged in development.

Course Outline :

- Unit 1-** Meaning and Forms of Social Change: evolution, progress, transformation; change in structure and change of structure
Theories and Factors of Social Change: linear, cyclical and curvilinear; demographic, economic, religious, bio-tech, info-tech and media
- Unit 2-** Social Change in Contemporary India: trends of change, processes of change - sanskritization, westernization, modernization, secularization
Changing Conceptions of Development: economic growth, human development, social development; sustainable development, the question of socio-cultural sustainability, multiple sustainabilities
- Unit 3 -** Critical Perspectives on Development: ecological, liberal, Marxian Theories of Development and Underdevelopment: modernization theories, centre-periphery, world-systems, unequal exchange
Paths and Agencies of Development: capitalist, socialist, mixed economy, Gandhian; state, market, non-governmental organizations
Social Structure and Development: structure as a facilitator/inhibitor, development and socio-economic disparities, gender and development
Culture and Development: culture as an aid/impediment to development, development and displacement of tradition, development and upsurge of ethnicity
- Unit 4 -** Indian Experience of Development: sociological appraisal of Five-Year Plans, social consequences of economic reforms, socio-cultural repercussions of globalization, social implications of info-tech revolution
Formulating social policies and programmes: policy and project planning, implementation, monitoring and evaluation of methodologies.

Pedagogy :

A special feature of the pedagogy of this course should be to take the students to sides of success stories of development as well as the failure stories of development in the region. The students may also be encouraged to participate in Workshops to critically

examine the existing indicators of human development and to formulate alternative sets of indicators of human development, social development and sustainable development.

Paper III**Comparative Sociology****Objective :**

There is much discussion these days on the reorientation of sociological research and the contextualisation of sociology to the experience of non-Western countries. The objective of this course is to sensitize students to the salience of the comparative perspective in sociology by highlighting the historical and social context of its development, key issues and themes as well as theoretical concerns, and by contextualizing them to the Indian situation.

Course Outline :

- Unit 1 -** The salience of the comparative perspective in the social sciences in general and in sociology in particular; indices of comparison: culture, nation, class, gender.
- Unit 2 -** Historical and social context of the emergence and growth of sociology in the West; the Eurocentric moorings of Western sociological tradition; Americanization of sociology; national traditions in sociology.
- Unit 3 -** The emergence and growth of sociology in Asia and Africa; the colonial context; the impact of Western sociology on the development of sociology in the Third World; sociology in a post-colonial mould; the issue of reorientation of research and teaching in sociology in accordance with national concerns and priorities.
- Unit 4 -** Central themes in Comparative Sociology: Modernity; Development; Diversity, Pluralism and Multiculturalism Nation-state; Environment; Gender; Globalization.

Unit 5 - Theoretical concerns and debates in Comparative Sociology: Problems of theorising in sociology in comparative and cross-cultural perspective; Contextualization (the need to attain teaching and research as well as theoretical concerns and methodological approaches in sociology to national concerns and priorities; Sociology as social criticism, policy issues: formulation and evaluation.

Unit 6 - The Indian Context: the bearing of the colonial context on the development of sociology in India; the continuance of the colonial legacy in contemporary Indian sociology, the debate on decolonization, contextualization and indigenization; the focus on national and regional concerns.
